

**DESIGN GUIDE
FOR THE
HORIZON SYSTEM**

Sentexsystems

INTRODUCTION

The purpose of this guide is to assist you in meeting any specification requirements you may encounter in installing a Horizon system. The information enclosed in this manual is to be used for reference purposes only and is not intended to be an installation or programming manual.

TABLE OF CONTENTS

<u>SECTION NAME</u>	<u>PAGE</u>
1. Cabinet Dimensions	2
2. Wire Chart	2
3. Dimensional Drawing of the Horizon "H" Surface Mount System	3
4. Dimensional Drawing of the Horizon "H" Flush Mount System	4
5. Dimensional Drawing for the Horizon "M" System	5
6. Illustration of the Main Processor Board	6

IMPORTANT: The Sentex Systems, Inc. warranty on this system is conditioned upon Sentex Systems, Inc. being paid in full for this equipment. The warranty will not be honored until such payment is received by Sentex Systems, Inc.

CABINET DIMENSIONS

<u>TYPE OF SYSTEM</u>		<u>HEIGHT</u>	<u>WIDTH</u>	<u>DEPTH</u>
Horizon "H" System	Surface Mount	8.89"	13.08"	4.25" (top)
	Flush Mount Back Box	9.20"	13.31"	3.06"
	Flush Mount Bezel	10.46"	14.58"	
Horizon "M" Systems	Surface Mount	9.64"	13.47"	2.21"

WIRE CHART

PLEASE NOTE: If the wires you are pulling for this installation are going to be run through an indoor, weather-proof location, it is acceptable to use unshielded cable. If the wires are going to be run through an outdoor location, we recommend that you use shielded cable. Recommendations for both types of cable are provided where needed.

<u>Cabling to the Main Processor Board</u>	<u>Type of Wire</u>	<u>Recommendations</u>
--	---------------------	------------------------

From the power transformer or power supply
120 VAC outlet

2 conductor cable

See chart below:

DC POWER WIRE SIZE	DISTANCE	AC POWER WIRE SIZE
18 AWG	30' and under	16 AWG
18 AWG	30'-75'	12 AWG
14 AWG	75'-150'	10 AWG
12 AWG	150'-250'	-----
10 AWG	250'-500'	-----

PLEASE NOTE: If you are using the larger sizes of cable (i.e., 12 awg or 10 awg), you may experience problems inserting the wires into the terminal block. If you encounter this problem, you can connect a 16-18 awg wire (with the use of a wire nut) to each end of the power cable, as long as the smaller gage wire is under 12 inches in length.

From the door strike or the door strike
power supply

2 conductor cable

See specifications for
the device you are
installing.

From the telephone company jack

2 conductor
18 to 24 awg cable

Shielded-Belden #9501
Unshielded-Belden #8740
